With climate change no Fifty Degrees Below a theoretical event possibly affecting other people in other places, but a material and palpable reality in people's lives, Fifty Degrees Below moves to the more urgent question of how action happens. The second of three linked novels set in the strife-torn world of big science, operating out of the corrupt political heart of the developed worldIn the interface between big science and big business lies the potential for the absolute destruction or salvation of our world, as new discoveries open ever more remarkable doorways into the future. Further, it seems that Robinson is building this story toward some important and thoughtful observation Fifty Degrees Below our fate as a species, as a nation and as individuals, and I want to find out what that is.
